EDUCATION

Georgia Institute of Technology

Master of Science in Computer Science – Specialization in Computing Systems

Expected May 2028

Atlanta, GA (Remote)

University of Southern California

Bachelor of Science in Computer Science

Aug. 2021–May 2024

Los Angeles, CA

PROFESSIONAL EXPERIENCE

Code Ninjas

Coding Instructor

Mar. 2025–Present

Murrieta, CA

- Instruct 120+ students in JavaScript, C#, and Lua game development while facilitating STEM enrichment programs for underserved student communities at local elementary schools, and lead technical workshops in game scripting and 3D CAD

CyberArk

Software Engineer Intern

Jul. 2022–May 2024

Newton, MA (Remote)

- Reduced Jenkins CI/CD pipeline build times by 20% by migrating E2E Bash tests to Go using the Kubernetes client-go library, validating Helm deployments for an open-source Secrets Provider sidecar with 1M+ Docker pulls
- Developed open-source Conjur CLI commands to streamline secrets management by implementing the Conjur Go API client with Cobra, achieving 98% unit and integration test coverage
- Eliminated low-to-critical CVE vulnerabilities by monitoring Snyk dashboards across internal projects, refactoring scripts and manifests, and contributing to incident response and remediation workflows with CHANGELOG documentation
- Co-implemented Identity OIDC authentication through Bash scripts to enable SSO support and automated secrets rotation, supporting IAM and RBAC workflows across various enterprise projects
- Improved open-source Kubernetes integration documentation, enhancing onboarding for external customers and contributors

AEVEX Aerospace

Software Engineer Intern

May 2021–Aug. 2021

Solana Beach, CA (Remote)

- Built a GeoFOCIS UI extension with .NET WPF and XAML enabling pilots to broadcast geospatial data over TCP/IP and UDP networks, validated with custom C# socket test servers to ensure successful data transmission
- Leveraged Java's JAXB framework to deserialize ATAK Cursor-on-Target messages containing geographic coordinates transmitted by firefighters for aircraft pilots to render onto GeoFOCIS 3D map layers in real-time

RELEVANT PROJECTS

Smart Budgeting | Go, React, Plaid API

May 2026–Present

- Developing a personal finance web app integrating Plaid API for real-time expense tracking and implementing AI-powered spending analysis to support smarter financial decisions

MoveIntel | Vue, AWS, Cloud Firestore

May 2024

- Led AWS S3 integration for an AI-powered movement analysis platform, enabling large-scale storage and delivery of patient rehabilitation data including video analysis, prognosis details, and personalized exercise tutorials
- Implemented AWS CodePipeline for developer CI/CD and AWS Secrets Manager for secure handling of API keys
- Integrated Cloud Firestore for scalable user data management and developed Vue frontend components for data display

Film Base | Spring Boot, Node.js, Java

Dec. 2023

- Constructed backend of a movie catalog website with Spring Boot and Node.js, integrating JPA architecture for seamless REST API interactions with React frontend components
- Achieved 90%+ test coverage across backend and frontend using JUnit, Jest, Selenium, and Mockito

TECHNICAL SKILLS

Languages: Go, Java, Python, C++, C, C#, JavaScript, TypeScript, Swift

Frameworks & Databases: Spring Boot, Node.js, React, Vue, Cobra, MySQL, PostgreSQL, MongoDB, SQLite, SQL Server, Agile

Cloud & DevSecOps: Docker, Kubernetes, Helm, AWS, GCP, Jenkins, GitHub Actions, CI/CD, REST APIs, Linux, Unix, Git, PowerShell, VMware, Terraform, Ansible, Observability, Prometheus, Grafana, Snyk, ELK Stack, ArgoCD
